INTRODUCTION

The United States Coast Guard has made many of its technical reports available to the public through the National Technical Information Service, Springfield, Virginia. At present, over 1500 Coast Guard reports have been sent to NTIS for announcement and distribution.

This subject index includes all Coast Guard reports sent to NTIS after 1 January 1970, and does not include classified reports or reports sent to NTIS after 31 December 1979. This publication has been prepared to bring to the attention of Coast Guard and other field personnel, and act as a ready reference to, the research and advanced engineering efforts that have been conducted during the decade of the 1970's. It can be used to help answer the questions, "Has anyone tried to do it this way?" and "Will this type of device work?"

Information on how to order copies of these reports has been included mainly for the benefit of those personnel who are not familiar with NTIS.

INFORMATION ON ORDERING REPORTS

1. Form of Report Copies

Copies of the reports are available in two different forms - paper and microform. The paper copies are usually of zerox quality with poor reproduction of photographs. The microform is microfiche and has the same quality of reproduction as zerox paper copies. Microfiche is less expensive but does require special viewing equipment. Most all of the reports are available in either form.

2. How to Order

Unless you have a deposit account with NTIS, the easiest method of ordering is to complete Form NTIS-173. You can use a zerox of the attached NTIS-173. Only the front side needs to be completed. Payment must accompany each order. In most cases payment by a purchase order is simplest. If NTIS has report copies in stock, you should receive your order in two weeks. Otherwise, your order will take four to six weeks. If you wish to open a deposit account, call (703) 557-4770 for information.

3. Prices

To obtain the exact price of the report call (703) 557-4650 and give them the document (or "AD") number. All microform copies are \$3.50 per report regardless of length. The price of paper copies varies with the number of pages. Below are the present costs.

		500 - etc.	

4. Other Information

Abstracts of reports are available through an NTIS Search. A custom search for up to 100 abstracts costs \$125.00 and prices for more than 100 abstracts must be quoted by NTIS. You can request any subject of your interest. For more information on NTIS Searches call (703) 557-4640.

There are many other services available from NTIS concerning technical reports - only the basic services have been mentioned here. For information on these other services, call (703) 557-4600.
